<p style="text-align: center;"><u>Journal</u></p>

Create a website for you to use to write journal entries. The website must be appropriately styled throughout, link to new html files / pages and the content should be a journal of how your week has been, content can include:

- Improvements made
- Solutions / most proud of
- Errors encountered
- What you discovered
- Summary of project

<u>Criteria</u>

- Have an index.html file (homepage)
- Contain at least 2 extra pages / extra html files
- Use semantic HTML
- Use an external stylesheet
- Have an example of flexbox
- Display at least one image

Stretch:

- Animations
- Media queries

<u>Submission</u>

Submitted to Smart Assessor with a github repository URL.

Should also have content, journal entries for week 1 and week 2.

Publish through github pages.
